FRSBikeTraxx Crack For Windows is a bicycle ride log application that's geared towards cyclists. When you start tracking your cycling routes with the utility, you can keep a diary of your ride. With this app, you can log the day of the route, the distance, the average and maximum speed, the duration, the temperature, the wind direction and speed, notes, and other information. These notes are stored in a journal using a simplified and intuitive interface. You can also save the journal as a .txt file, so you can easily share it with other people and share your cycling adventures with them. The main goal of this application is to help you memorize the routes on which you ride your bike. You can use FRSBikeTraxx to write down what type of route you have, with which type of bike, and when and where you ride. You can also log all these information with your GPS. There are two main functions on this app: Note keeping and reports. You can use the Note feature to log the information that you want on your cycling route. The journal is saved in the default file on your computer, and you can only access it using the journal page. It's a pretty simple interface that isn't something complex to use. You can create an unlimited number of records, edit and remove them from the list, use a search function to quickly locate text across all records, and write a journal dedicated to cycling maintenance using FRSBikeTraxx. You can also select the type of data, the Font style, and the color scheme for your journal. Another important feature that you can use is a password. Apart from the journal, you can also use the Reports feature to generate and compare monthly and yearly reports. You can also view yearly logs. You can edit the monthly report by adding or removing some data. To edit the yearly report, you can do it directly in the application, by clicking on the month of the report. Besides, it's possible to generate some statistics such as monthly and yearly results, or compare the monthly and yearly reports to get an idea of your results. FRSBikeTraxx also has some bookmarks to cycling news. So you can use FRSBikeTraxx to track your cycling route and easily write down the details of each round, including type of riding (road, offroad), bicycle, distance, average speed, and much more.
