Verbace Pro 2.4 Serial 78

You can look up any word in the free dictionary, or you can look it up in the equivalent database. VerbAce-Pro is a Morphological Engine that contains databases for multiple languages, and will look at complex word structures. To look up a word, all you have to do is type it into the search box. The program also offers a selection of vocabulary sets. You can choose to have the words displayed as you type, or you can press a button to show them all at once. This will help you learn the vocabulary, and you can see which words you don't know. Once you have found a word, the rest is simple. You can click on the translation for the word and this will bring up a new screen with the translation. Your translation is available in the confirmation screen, and you can then click on the word to go to the other screen, and click OK to confirm that your translation was correct. Another way of looking up a word is to type it in into the search box and then look at the most suitable results to choose from. The translation is only one of the results. Click on a word, and it will show up in the word list. To search for translations in the program, click on the letter(s) that represent the word in the word list. This will show a screen with a number of options. You can select your language, or you can select the database that you wish to use, or you can use the Morphological Engine to translate a word structure. You can look up any word in the free dictionary, or you can look it up in the equivalent database.
