[Download](#)

now run the setup program. it should run smoothly. if there is any issue, click on yes, to keep the version that you already have. click on ok to start installation. wait for setup to complete (it may take about 2 minutes or so). click on ok to start hero

editor.exe (fig. 2a). next you have to configure the program. click on help from the menu and it will show you the help window (fig. 2b). click on the help menu item on the left, and it will open the help window (fig. 2c). on this screen you can check the installation settings, and install any additional components (if you choose to) (fig. 2d). it

is also advisable to disable the check mark of any unwanted component. leave the rest of the settings as default. once you are done with the installation, click on the arrow to the left, and select save from the menu. it will save the map in your computer as a backup. now you can work on the map to your

heart's content. as you move the cursor, it will outline your move. if you want to move a tile by dragging it to the desired location, select the tile to be moved, then move the cursor to the desired location. to delete a tile, simply click on the red cross to delete it. now you can do anything you want to do. for example, i am going to open a map

editor and add some land features. first open the map editor. you can find it from the map menu (fig. 3a). it will open the map editor. now it is time to add the land features to your map. click on add land features to open the land features panel. as you can see, i have added a mountain, a lake, and a river (fig. 3b). you can click on any of

these features to edit it. you can also add more features by clicking on the add land feature button (fig. 3c). once you are done, click on the arrow to the left, and select save from the menu (fig. 3d). it will save your map as a backup. 5ec8ef588b
