About Portable XLaunchpad An
efficient workspace allows you to
effortlessly access the resources
you need to employ in your tasks,
and some workarounds here and

there could make a difference in your productivity. Portable XLaunchpad is an application that promises to do just that for you by bringing close at hand all the apps, files, and folders you rely on in your routine so that you can effortlessly open them at a mouse click.

Portable launcher for apps, files, folders, URLs The advantage of a portable piece of software mainly refers to the fact that there is no need to install it, and using it from a USB stick is a given. As suggested

by its very name, Portable XLaunchpad has all these perks, and you only need to run its EXE file in order to be prompted with an easy-to-configure GUI. It is also worth pointing out that, in order to avoid workflow hiccups, the application hides in the system tray, where you need to go in order to launch it. While the program is capable of identifying the most used items on your system, it also allows you to add new ones. The range of items you can populate the

launcher with is quite wide and includes files, folders, URLs, and programs, which you can include in your list either by right-clicking the program's main window, then selecting them one by one or by turning to the drag and drop functionality. Allows for lots of configurations to increase productivity Note that deleting shortcuts is also possible, as is the case of customizing their icon and name. Aside from that, you may want to know that selecting your

icons' size is possible, with options such as large, medium, small and custom size being available for you to choose from. Autoarranging icons by usage and applying blur to the background could also come in handy and let you concentrate on what is really important to you. What's more, support for hotkeys is provided, which guarantees you can quickly reach the items you are interested in. Many other customizations are available in the Settings section, which is easy to

configure, regardless of your tech skills, and backup and restore functionality is integrated as well to prevent data loss. Approachable tool that gives quick access to your resources

Portable XLaunchpad [Mac/Win]

KeyMacro allows you to assign hotkeys to macros. They can be applied to individual files, folders, or even entire folders. Hotkeys can

be dragged and dropped on the toolbar area, or pinned to it, as well as to a folder tree view on the left side of the screen. KeyMacro is a simple yet powerful application that helps to make life simpler, especially when it comes to having quick access to various files and folders on your PC. KeyMacro is the ultimate replacement of the File Manager. You will notice a difference. It uses the key mappings to enable quick access to folders and files. KeyMacro is

capable of organizing its own file structure, adding or removing shortcuts to files, folders, and drives on-the-fly. Additionally, you can remove or change hotkeys as well as assign keyboard shortcuts. KeyMacro allows you to change the number of toolbar buttons and even the placement of hotkeys.

KeyMacro allows you to move or remove buttons and hotkeys, add more buttons, set their sizes, and many other things. KeyMacro allows you to easily access your

favorites. You can organize your favorites in any way you want, even adding new favorites by right clicking a button. KeyMacro allows you to set up, configure and use any number of filters. KeyMacro allows you to use an extended KeyStroke or a KeyMacro button to open and close windows. KeyMacro is capable of finding and opening text files, xml files, html files, web pages, links and anything that can be turned into a text file. KeyMacro allows you to edit shortcuts of the

buttons, change their text, change their size, color, order, assign shortcuts to them, etc. KeyMacro supports Microsoft Windows, Linux, and Apple Mac OS. KeyMacro is highly customizable, allowing you to change almost anything.

KeyMacro is an application that offers a truly unique feature to every user: the ability to assign hotkeys to macros. What's more, you can organize these macros into groups, giving them their own menus. KEYMACRO allows you to

assign shortcuts to macros and groups, assign groups to folders, files, drives and partitions.

KEYMACRO also allows you to show custom search shortcuts as well as see the location of all the folders on your computer.

KEYMACRO allows you to drag and drop key mappings on the toolbar.

work as I expected I have an array which I will output, after being sent through the following function:

```
function clean($array){ $new_array = array_values($array); return array_unique($new_array); }
```

But when I do this, the array is unordered. Is there any way to set the order of the array? A:

`array_unique()` only returns the values of the array that are unique.

It doesn't rearrange the order of the array. You could loop over it and put it back in order foreach

```
($new_array as $val) {  
$new_array[] = $val; } Current
